SUSHANT CHAUHAN

Ethical Hacker | AI Surveillance Researcher | Future Tech Entrepreneur

Phone: +91 9329348230   Email: Sushantchauhanx77@gmail.com

Address: At Post Near Police Colony, Chandrapur - 495692, District Shakti, Chhattisgarh, India

Career Objective

To innovate powerful AI-driven surveillance systems and build technologies like bionic limbs and cancer hospitals that make a real-world impact. Aiming to pursue research at MIT someday to develop the world's first artificial brain.

Skills & Tools

Ethical Hacking (Bug Bounty on Bugcrowd & HackerOne)

AI Surveillance System Developer (Project: GODSEYE)

Tools: Kali Linux, Burp Suite, Nmap, Metasploit, Wireshark

Languages: Python, Bash, HTML, JavaScript

Red Team Simulation & Web Exploitation

Recon, OSINT, Payload Crafting, RAT Simulations

OSCP (Offensive Security Certified Professional) - Practitioner level

Advanced understanding of exploit development and post-exploitation frameworks

Projects

- RAAVANA-GODSEYE ULTRA - Real-time AI-based Web Surveillance System

- Bug Reporting - Reported HTML-based bug to NASA via responsible disclosure

- Ashu WebStress Tool - Ethical testing tool for red team simulation

- Pegasus Android RAT Simulator - Research tool (educational use only)

Education & Training

12th (Senior Secondary) - Chhattisgarh State Open School

Trained at several top cybersecurity institutions across India, including:

- Phoenix Cybersecurity, Mahal, Nagpur

- Jetking Institute, Raipur

- Craw Security

Dropped formal courses after mastering the required knowledge through practical experience.

Why Cybersecurity Matters

In today's digital era, every person and device is somehow interconnected. From financial systems to personal communication, everything relies on the internet. Cybersecurity is not a luxury anymore - it is a necessity to protect our identities, data, businesses, and even national security from evolving digital threats. Empowering people with cybersecurity awareness is as essential as health or education.
